Program title: NewsWatch

Time/Date: 1734 – 6/26/12

Source: L

Length: 121 sec

Description: The hot and dry weather has led to drought conditions across central Illinois. Pest control experts say a drought can bring out the worst in some insects. Some common bugs are bees, ants and grasshoppers. The insects go hunting for moisture to survive and houses and residential areas tend to be the perfect place for insects like bees and ants to infest during drought.

Program title: NewsWatch

Time/Date: 1734 – 6/26/12

Source: L

Length: 113 sec

Description: The drought is taking its toll on wildlife too. Shallow water in rivers and ponds cause issues. Crowding causes fighting, disease and stress. Baby turtles become easy prey because the water is so shallow. Herons have to travel farther. Humans can help by placing out bird baths and routinely changing the water.
